

Claims

1. An electric lamp having a glass envelope, the glass being red colored, the
5 glass composition comprising copper between 0.1 and 2% by weight, tin between 0.1 and 2%
by weight, barium between 7 and 11% by weight, and strontium between 1 and 5% by
weight.
2. An electric lamp as claimed in claim 1, wherein the glass composition,
10 expressed in percents by weight of the oxidic forms of the constituents, comprises :

SiO ₂	60-72
Al ₂ O ₃	1-5
Li ₂ O	0.5-1.5
Na ₂ O	5-9
K ₂ O	3-7
MgO	1-2
CaO	1-3
SrO	1-5
BaO	7-11
CuO	0.1-2
SnO ₂	0.1-2
